at the intersection of the history of constitutional ideas and of political theory this book offers a new genealogy of the constitutional thought of the european union centrally the book traces the emergence and transformation of the post sovereign thesis an argument that seeks to move beyond the routine opposition between states and european organization by claiming the concept of sovereignty to be obsolete and its complicated relationship with liberalism analyzing the thought of a series of constitutional thinkers who have developed different versions of this thesis in relation to european integration the book shows that far from being new as is generally assumed the post sovereign thesis goes back to the late nineteenth century exploring the interplay of these thinkers critical conceptualizations of sovereignty and of their views on liberalism the book argues that although they shared a concern for the transformation of a world seen as increasingly interdependent they imagined deeply different versions of post sovereignty bringing this history into focus the book offers a rich new perspective
