although there have been other studies of elite administrators in
france great britain germany and russia john armstrong has made the
first systematic comparison of their roles especially their
inclination to participate in economic development drawing on role
theory and theories of socialization and recruitment he analyzes the
influences that family secondary school specialized university
instruction and in service experiences have had on administrators
currents of ideas class concepts of appropriate role behavior and
organizational peculiarities are also examined as possible
influences by exploring this subject over a long period in some
cases reaching as far back as the seventeenth century this book
shows how changing definitions of administrators roles reflect their
position in society and permit the exploration of changing
socialization processes the long time span also shows how factors
such as administrative intervention can change from being marginally
important to crucial in affecting economic growth from the diverse
european experience the author distills five factors which he
hypothesizes have exerted a constant positive influence on
administrative intervention in economic development and suggests how
these factors might be applied in analysis of other societies he
also provides a wealth of statistical data and an extensive
