what differentiates this book from other healthcare improvement books is that it is the only currently available book that presents a simple recipe of 46 lean steps for healthcare providers to reduce cost and improve quality by taking these straightforward steps healthcare providers can adopt the same lean methods which have enabled companies like toyota to become so successful the first part of the book explains cost and quality issues facing u s healthcare from that understanding the second part then teaches healthcare providers a 46 step recipe to reduce costs and improve quality by using toyota lean production methods with industry experts citing that as much as 40 of the total cost of healthcare production is attributed to wasteful processes it is logical that reducing waste will lower costs this is the basis of this book although other books have presented toyota s lean methods this book goes further by showing how to directly apply those successful methods to healthcare where they are sorely needed this book is intended to be a practical manual for healthcare providers to use to improve quality and reduce costs it can be a multi year strategic plan for healthcare providers to adopt this second edition includes additional improvement steps and five new appendices of practical examples authored by renowned lean experts

a public sector journey to operational excellence links effective government operations to the ability to accomplish bold social goals the book illustrates how the principles and techniques of continuous improvement can be applied to public sector management and public policy development the linkage of management to policy is woven throughout the four sections part 1 begins with the history and application of the principles of continuous improvement ci readers are introduced to lean and related methodology ci principles are then juxtaposed with john m bernard s categorization of three stages of maturity in government next guidance is provided on how to launch a ci initiative in the public sector

leading to a discussion of public administration in theory and practice part 2 examines the application of ci to governmental operations examples such as the va s hiring process underscore the need to lean bureaucratic and regulatory processes profiles of ci work in several states illustrate both the potential and the pitfalls leading to recommendations for an optimal model part 3 acknowledges that among the responsibilities of government the public policy function is the most difficult to lean it discusses the complexities inherent in government since the public policy is both a political and an administrative function toyota kata methodology is illustrated with its potential application to the challenges of policy development it could be a force multiplier when civics and politics meet ci part 4 links the promise of ci to make government more effective enabling it to solve complex problems strategies are proposed to overcome the threats and sustain the gains in these initiatives cognizant of the many challenges the book closes with a range of recommendations and a reflection on the purpose of government

html body data pb style evj64f9 this document is a compilation of togaf series guides addressing business architecture it has been developed and approved by the open group and is part of the togaf standard 10th edition it consists of the following documents togaf series guide business models this document provides a basis for enterprise architects to understand and utilize business models which describe the rationale of how an organization creates delivers and captures value it covers the concept and purpose of business models and highlights the business model canvastm technique togaf series guide business capabilities version 2 this document answers key questions about what a business capability is and how it is used to enhance business analysis and planning it addresses how to provide the architect with a means to create a capability map and align it with other business architecture viewpoints in support of business planning processes togaf series guide value streams value streams are one of the core elements of a business architecture this document provides an architected approach to developing a business value model it addresses how to identify define model and map a value stream to other key components of an enterprise s business architecture togaf series guide information mapping this document describes how to develop an information map that articulates characterizes and visually represents information that is critical to the business it provides architects with a framework to help understand what information matters most to a business before developing or proposing solutions togaf series guide organization mapping this document shows how organization mapping provides the organizational context to an enterprise architecture while capability mapping exposes what a business does and value stream mapping exposes how it delivers value to specific stakeholders the organization map identifies the business units or third parties that possess or use those capabilities and which participate in the value streams togaf series guide business scenarios this document describes the business scenarios technique which provides a mechanism to fully understand the requirements of information technology and align it with business needs it shows how business scenarios can be used to develop resonating business requirements and how they support and enable the enterprise to achieve its business objectives reactions from other readers a quality hard copy of the togaf method easier to read than endless htm docs or huge pdfs the togaf framework has become the de facto standard for developing enterprise architectures a good one stop shop guide and toolsets for getting your enterprise architecture right a lot of thought experience and funding have gone into this and the results are well worth the price you pay for the book and the actual accreditation should you or your organization wish to go down that route amazon comment it still is the best documented enterprise architecture method publicly available the book is of high quality binding and will endure browsing through the pages for a long time amazon comment

the definitive big picture on the financial crisis from the man behind the oscar winning documentary that exposed the workings of the new economic elite based on explosive interviews court documents and corporate archives inside job traces in gripping detail how decades of deregulation gave birth to a predator nation with power players cycling through positions in government academia and wall street and continuing to do so even in the wake of the global financial crisis with stunning clarity charles ferguson delivers an uncompromising accounting of how a new economic oligarchy has wrested control of our politics and the prospects for real recovery

a sweeping new interpretation of the history of civilization and a transformative vision of how our species will thrive on an unpredictable earth the viruses keep coming the climate is warming and the earth is rewilding our human family has no playbook to address the mayhem unfolding around us if there is a change to reckon with argues the renowned economic and social theorist jeremy rifkin it is that we are beginning to realize that the human race never had dominion over the earth and that nature is far more formidable than we thought while our species seems much smaller and less significant in the bigger picture of life on earth undermining our long cherished worldview the age of progress once considered sacrosanct is on a deathwatch while a powerful new narrative the age of resilience is ascending in the age of resilience rifkin takes us on a new journey beginning with how we reconceptualize time and navigate space during the age of progress efficiency was the gold standard for organizing time locking our species into the quest to optimize the expropriation commodification and consumption of the earth's bounty at ever greater speeds and in ever shrinking time intervals with the objective of increasing the opulence of human society but at the expense of the depletion of nature space observes rifkin became synonymous with passive natural resources while a principal role of government and the economy was to manage nature as property this long adhered to temporal spatial orientation writes rifkin has taken humanity to the commanding heights as the dominant species on earth and to the ruin of the natural world in the emerging era says rifkin efficiency is giving way to adaptivity as the all encompassing temporal value while space is perceived as animated self organizing and fluid a younger generation in turn is pivoting from growth to flourishing finance capital to ecological capital productivity to regenerativity gross domestic product to quality of life indicators hyper consumption to eco stewardship globalization to glocalization geopolitics to biosphere politics nation state sovereignty to bioregional governance and representative democracy to citizen assemblies and distributed peerocracy future generations suggests rifkin will likely experience existence less as objects and structures and more as patterns and processes and come to understand that each of us is literally an ecosystem made up of the microorganisms and elements that comprise the hydrosphere lithosphere atmosphere and biosphere the autonomous self of the age of progress is giving way to the ecological self of the age of resilience the now worn scientific method that underwrote the age of progress is also falling by the wayside making room for a new approach to science called complex adaptive systems modeling likewise detached reason is losing cachet while empathy and biophilia become the norm at a moment when the human family is deeply despairing of the future rifkin gives us a window into a promising new world and a radically different future that can bring us back into nature's fold giving life a second chance to flourish on earth

proven strategies for revolutionizing healthcare systems if i had to sum up this book in one word the word would be brilliant this is one of the most insightful books on toc not just for healthcare that i have ever read bob sproull author of the ultimate improvement cycle maximizing profits through the integration of lean six sigma and the theory of constraints performance improvement for healthcare leading change with lean six sigma and constraints management lays out an integrated approach for using three industrially based methods to transform hospital operations in terms of patient outcomes

and experience financial viability and employee satisfaction this pioneering guide presents a scalable strategy for managing bottlenecks eliminating waste reducing errors and containing costs in healthcare organizations as well as sustaining the gains achieved real world case studies illustrate successful performance improvement implementations that have realized breakthrough operational and financial results coverage includes constraints management applications in healthcare the novaces systemcpi an integrated performance improvement deployment approach three part assessment strategic gap analysis system level value stream analysis and system constraint analysis planning a performance improvement program deployment to ensure timely and consistent execution applying the right tool to the right problem from a system perspective sustaining gains achieved by the performance improvement team defining a path to self sufficiency

rhetoric and resistance in the corporate academy analyzes the political and legal struggles between labor movements and school administrators over the rise of part time and temporary jobs in higher education focusing particular attention on the labor of writing instruction carter finds among literacy workers both a deeply exploited segment of the campus population and a vector of resistance to the hegemony of flexible hiring contrary to visions of ivory tower seclusion he traces continuities between teachers and students experiences as corporate employees contending that their frequently insecure positions inadequate working conditions minimal benefits and marginalized voices constitute grounds for political alliance carter then outlines a labor theory of agency that entails long range collaboration among tenure line faculty part time and non tenure track teachers and student social movements listening always for harmonies as well as dissonances among their modes of argument

manufacturing forms the base of the japanese economy and will continue to do so it is supported by a host of specialists both in end user products and intermediary components many of these specialists are not behemoths they can be described as leading medium sized enterprises or lmes this book traces the rise of these lmes it shows how they forged their own course often at variance with the ideas of the central authorities honing their art of monozukuri or making things at each point in the historical narrative actual entrepreneurs and the lmes they created are cited having contributed handsomely to japan s industrial evolution from industrialization to the information age these lmes are now globalizing and in so doing assuming a role as east asian regional specialists

vols for 1956 include selected papers from the proceedings of the american veterinary medical association
